Gwen Stefani

Gwen's son Kingston is often spotted in dresses, skirts and even paints his nails pink!

"It's really important more than anything else to not be talked into something, to stand your ground and to be able to be strong about what you feel," she said in an interview.

"I don't want them to try to be like everyone else, and at that age, everybody just wants to have the same shoes everybody else has, and I don't really like that. If they do want to, I'll support that as well. You just want them to be happy. It's a short life and it goes by so quick."

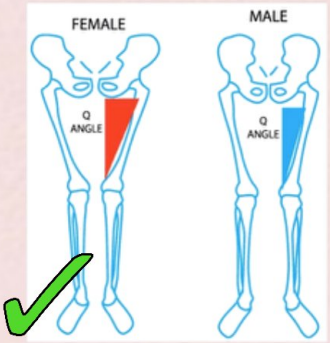
Adam Sandler has a Female q angle



Adam Sandler appears to be a Breeder.

This is what pregnancy looks like; it does not look like those Hollywood twigs wearing a moonbump.

In addition, Adam is displaying a Female gait, while his "wife" has a pronounced Male q angle.

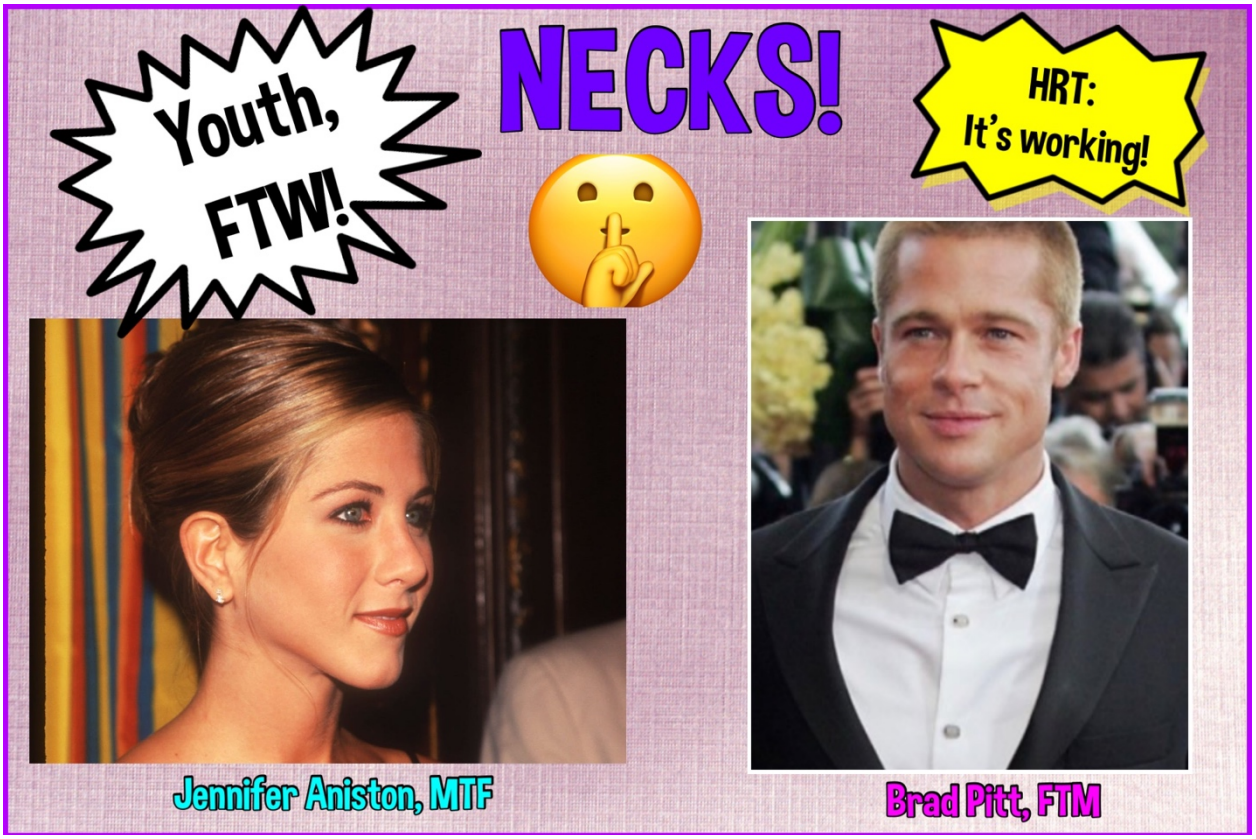
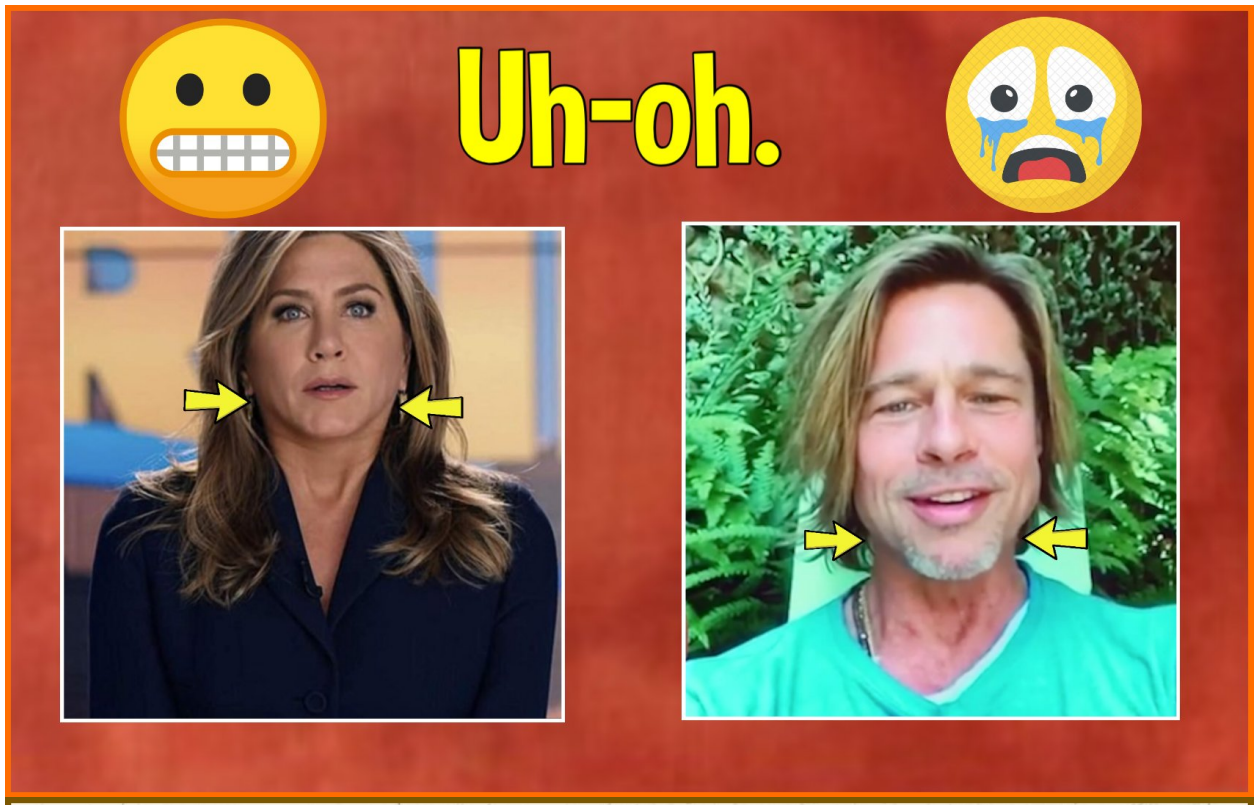
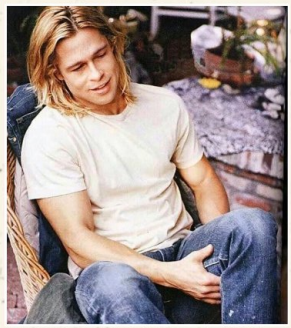
Brad Pitt & Angelina Jolie – Inverted Q Angles

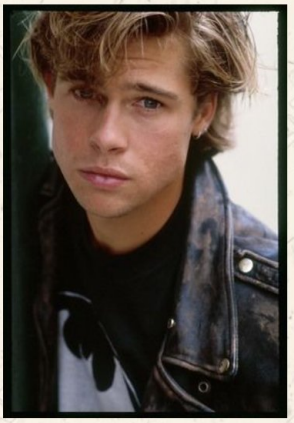
Photographic documentation of skeletal markers of suspected EGI subjects

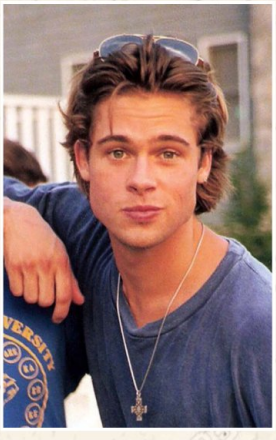


Photographic documentation of skeletal markers of suspected EGI subjects





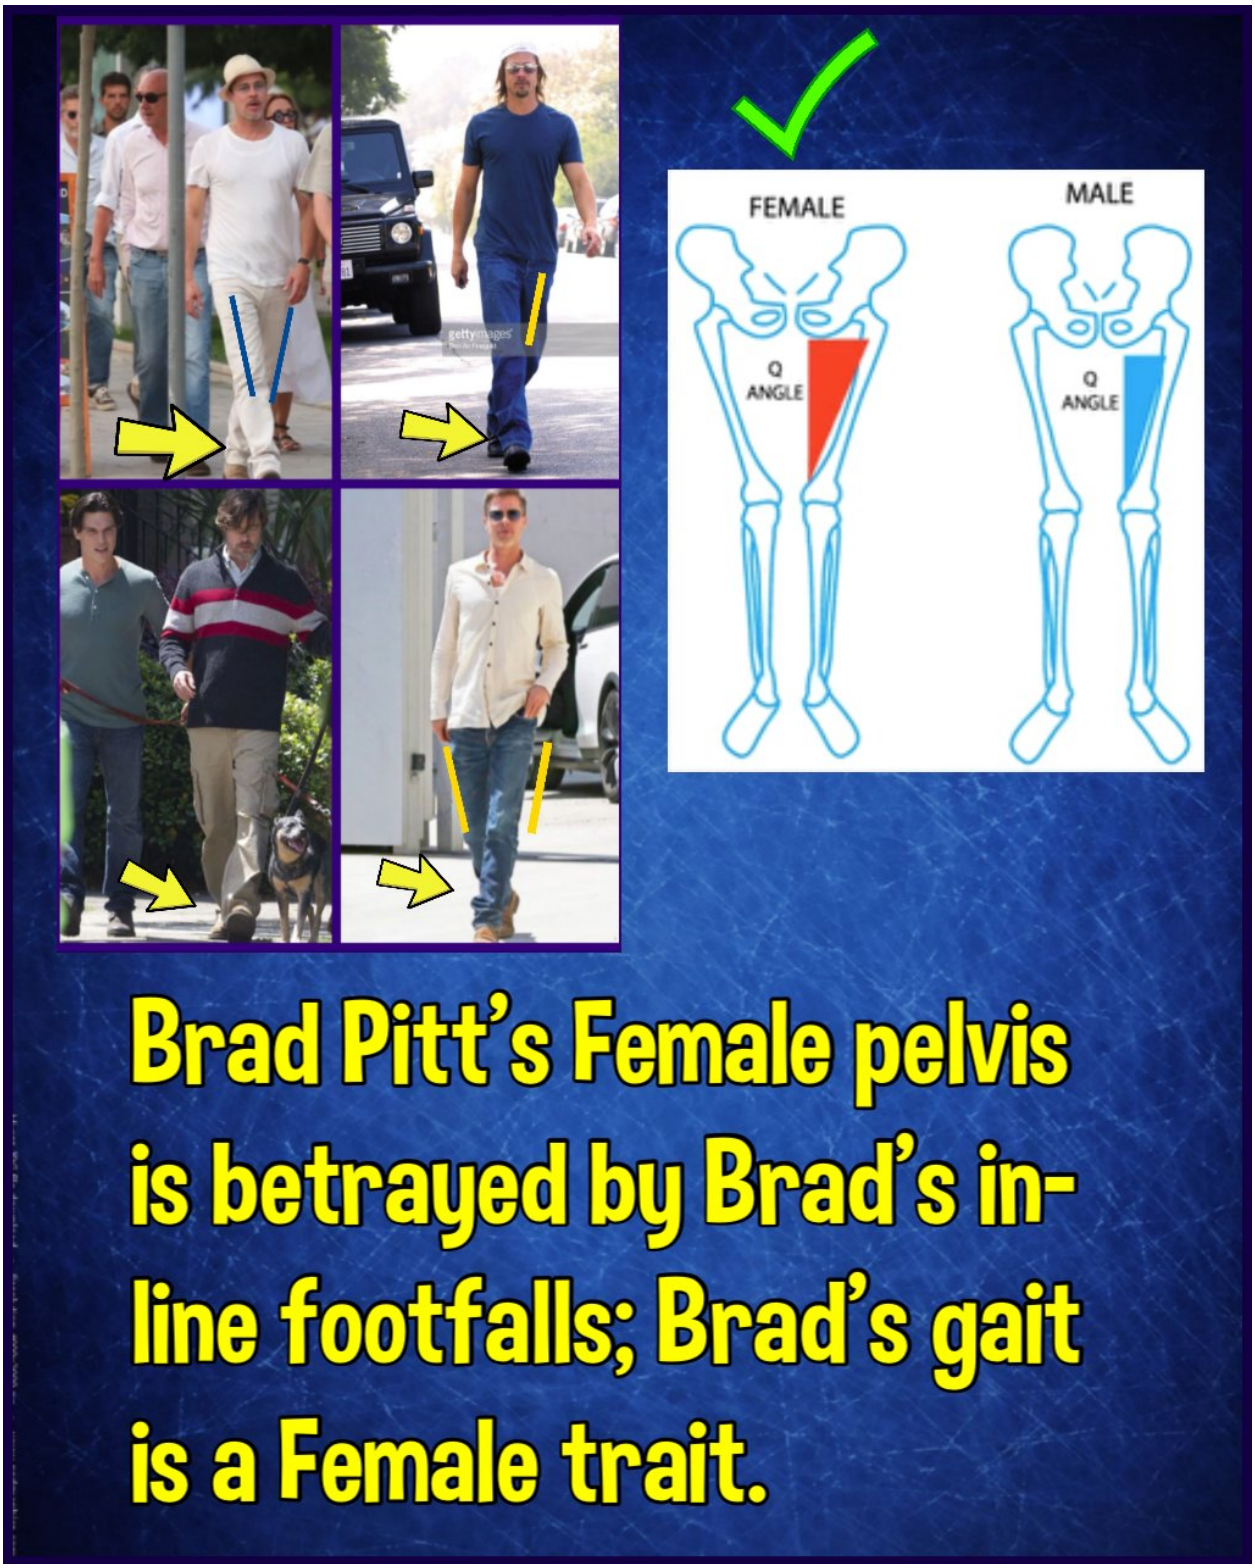




Brad Pitt is a most convincing FTM transgender. We could debate Brad's possible cosmetic surgeries all day, but let's skip to the most reliable gender-determining attribute available to us (thanks to the myriad candid photos online of Brad walking.)

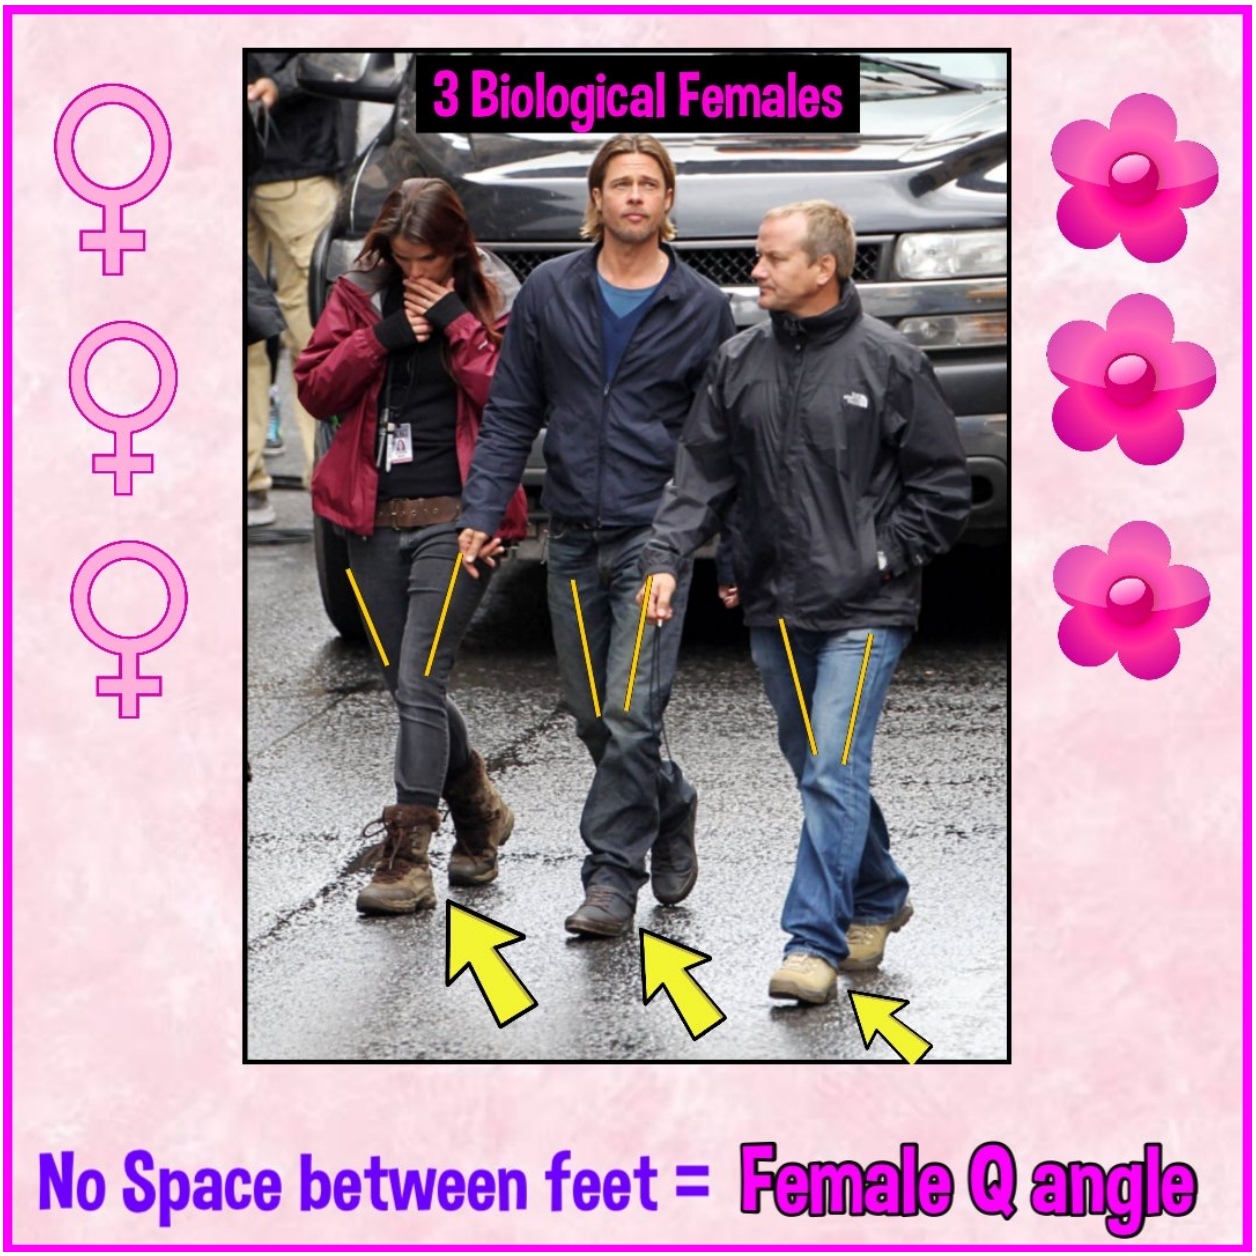
Presenting Brad Pitt's Q-Angle:

Photographic documentation of skeletal markers of suspected EGI subjects



Photographic documentation of skeletal markers of suspected EGI subjects

Photographic documentation of skeletal markers of suspected EGI subjects



Photographic documentation of skeletal markers of suspected EGI subjects

Who's this curvy lady?

Photographic documentation of skeletal markers of suspected EGI subjects

The FTM TG desiring a more masculine appearance may choose to undergo a procedure called:

Natural Adam's Apple Implant Augmentation

This is a relatively simple surgical procedure wherein rib cartilage is removed and shaped into the form of an Adam's apple. The reshaped tissue is then inserted into the throat via a small incision under the chin:

Diagram, Human throat

Gail K. Boudreaux

President and Chief Executive Officer

Gail K. Boudreaux is President & CEO of Anthem, Inc., a Fortune 50 company and leading health benefits provider, serving more than 42 million insured members through its affiliated health plans. In total, Anthem serves over 106 million lives through its broad portfolio of health insurance and services subsidiaries.

Throughout her more than three decades in the healthcare industry, Ms. Boudreaux has established an outstanding record of successfully leading multi-billion dollar businesses. As former CEO of United Healthcare, Ms. Boudreaux led the largest business division of UnitedHealth Group, where she had responsibility for approximately $120 Billion in revenue and managed more than 60,000 employees serving 45 million consumers. Prior to United Healthcare, Ms. Boudreaux served as Executive Vice President of Health Care Services Corporation and earlier as President of Blue Cross/Blue Shield of Illinois. Ms. Boudreaux currently serves on the board of directors for Zimmer Biomet Holdings. She earned a bachelor's degree with honors from Dartmouth College and an MBA with distinction from Columbia Business School.

Gail has been named as one of Fortune Magazine's Most Powerful Women in Business…and featured by Forbes as one of 100 Most Powerful Women in the World. Additionally, she has been named by Modern Healthcare as one of the 100 Most Influential People in Healthcare, and she also received the 2018 Billie Jean King Leadership Award.

Conor McGregor claims fight with UFC rival is off: 'Inbred hillbilly'

The 'obsession' that killed Conor McGregor in latest crushing loss

Mixed martial arts legend Conor McGregor allegedly flashed his genitals to a married woman at a bar as he vacationed in the South of France with his fiancée, according to a report.

The unidentified woman claims McGregor, 32, who was arrested Friday and released a day later without being charged, assaulted her and gave her an unwanted peep show at a bar in Calvi on the island of Corsica as she vacationed with her husband, according to the Sun, citing a report by TV broadcaster France 3 Corse.

The aging MTF tranny is faced with what is known as a Hobson's Choice (AKA Take it or leave it)

They can allow themselves a significant weight gain, thereby burying their unsightly man-veins under equally unsightly layers of hard man-fat ...

Or

The MTF tranny can accept the bulbous veins and hope no one notices (oh, but we'll notice; they're on your foreheads FFS)

Jared has suspiciously wonky excess breast tissue, and plenty of it. Jared never underwent any facial masculinization surgeries nor did he bother to have an Adam's apple implanted. Because of this, it is unlikely that Jared's weight gain's effect on his initial bilateral masectomy would be of paramount concern to him either.

In other words, Jared Fogle is one laid-back FTM transgender.

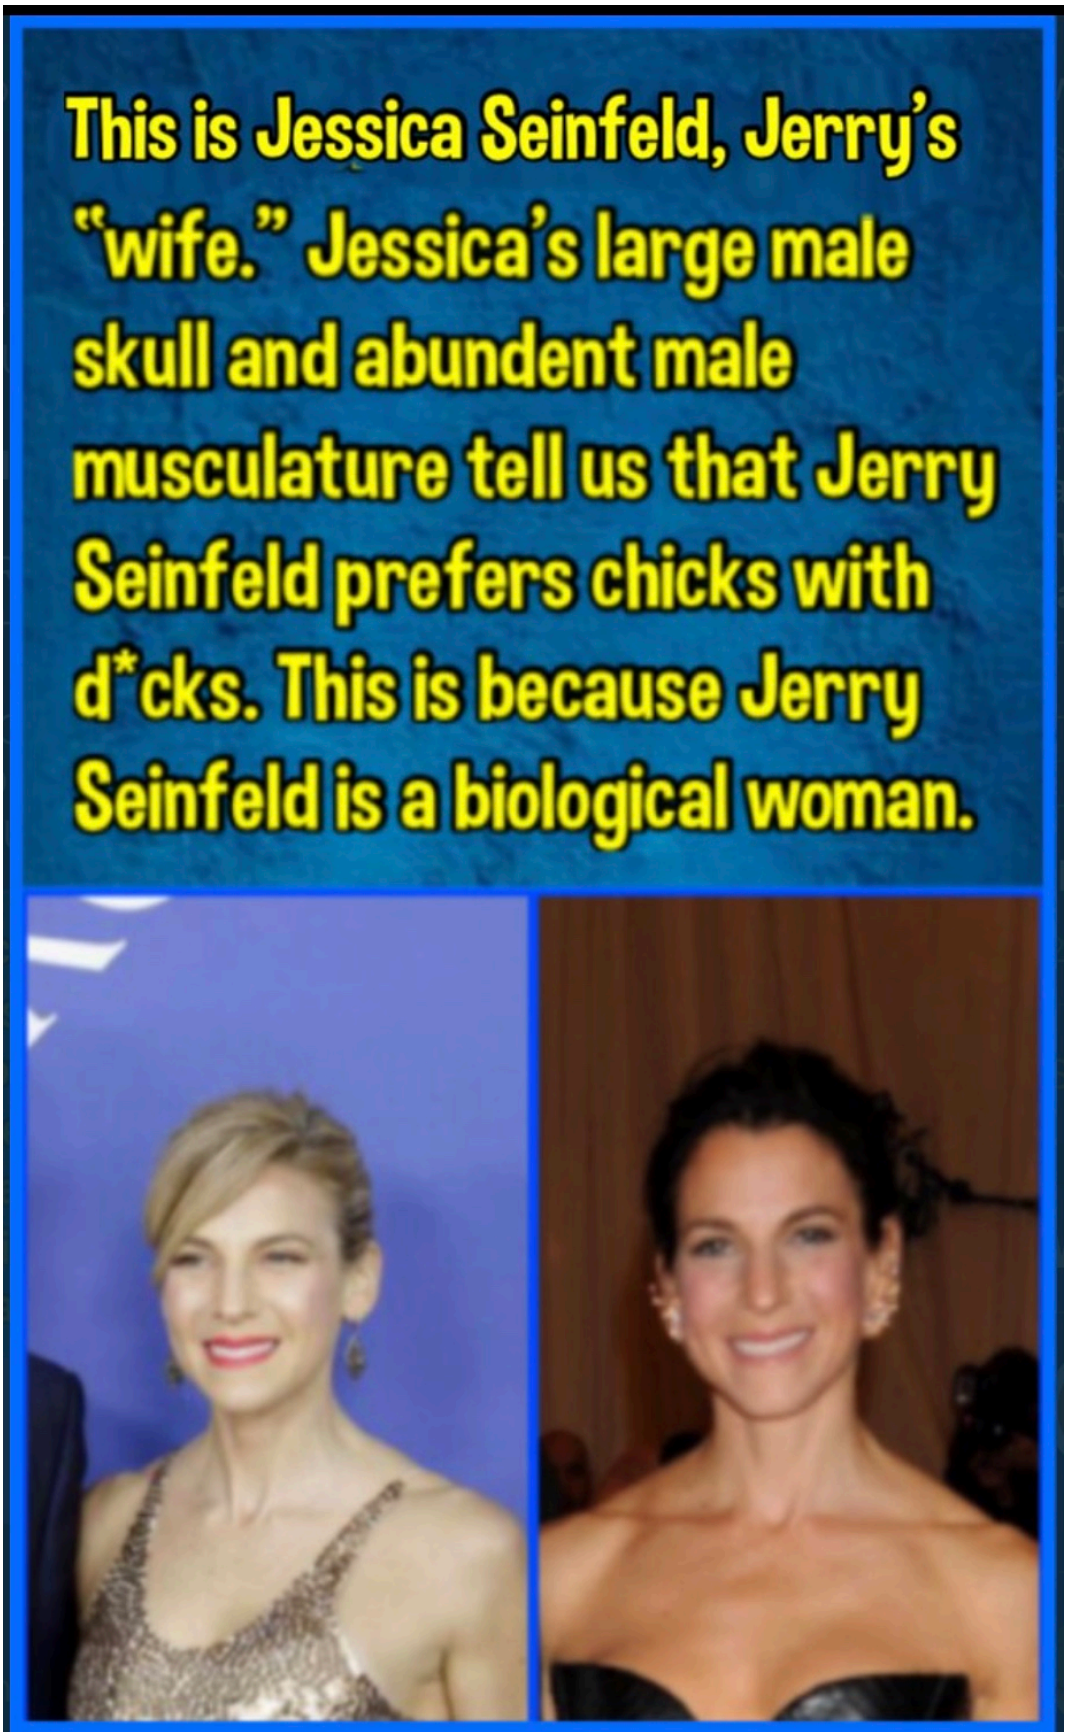
As is seen in my earlier post re FTM tranny Ben Affleck, Jerry Seinfeld also displays a soft, wide abdomen on the torso of a proported young MAN. As with Ben Affleck, Jerry Seinfeld has the pelvic width and subcutaneous fat layer of a biological woman:

Photographic documentation of skeletal markers of suspected EGI subjects

Look at Jerry's stomach; where are the chiseled abdomal muscles we see on magazine covers showing every "female" Hollywood actress just weeks after she has purportedly given birth? (Many times to twins or triplets!)

If Hollywood cash-cow Jerry Seinfeld couldn't attain chiseled abs without surgical implants, what makes any woman believe that she can?

Photographic documentation of skeletal markers of suspected EGI subjects



Photographic documentation of skeletal markers of suspected EGI subjects

This is Shoshanna Lonstein, Jerry Seinfeld's "scandalous" girlfriend Circa Seinfeld's heyday. Everyone was so mesmerized by this then-minor's large chest, no one noticed that Shoshanna is a man.

This is Shoshanna when she was still in High School, and dating Jerry:

Look at the size of this child's neck and upper torso.

The long arms.

The large square head and penatrating male-gaze are intimidating.

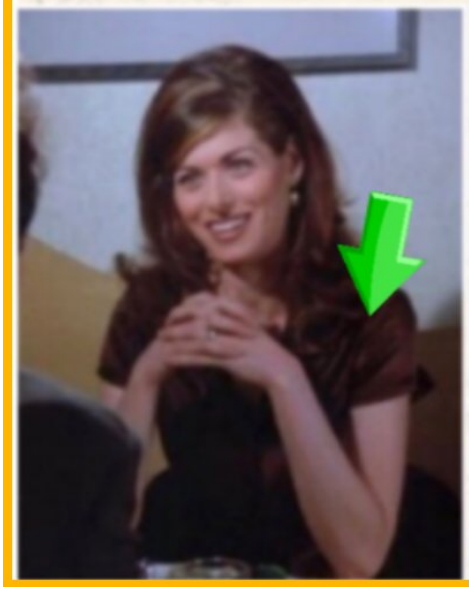
Photographic documentation of skeletal markers of suspected EGI subjects

DEBRA MESSING

Ep: Yada Yada Yada [1997]
Ep: Wait it Out [1996]

Photo [Left]: Debra has a long Male humerous bone [arm bone], massive thick skull and oversized teeth. However, while young, these Male skeletal traits can appear attractive, if distinctly Male.

Photo [Right]: Debra's maintenance rituals are being neglected, bc Debra's Adam's apple is showing.



Photographic documentation of skeletal markers of suspected EGI subjects

TERI HATCHER

Teri Hatcher guest-starred in 3 episodes of Seinfeld, including the finale in 1998

Photo [Left]. "They're real and they're spectacular" is the iconic line Teri/Sidra spoke on Seinfeld in re to Sidra's breasts. Although Teri had breast implants, Teri also had a suspiciously large [Male] torso; but Teri was young and pulled it off nicely.

Photo [Right]: As is evident, Males, regardless of estrogen ingestion, experience a mid-life testosterone dump that increases bone density.

TAWNY KITAEN

Tawny portrayed Isabel in 3 episodes during Seinfeld's early seasons.

Photo [Left]: During this time, Tawny was very beautiful, seductive, and also a popular music video vixen.

Photo [Right]: When the estrogen no longer works, I imagine these mandatory appearances for photo ops are dreaded occasions for the aging MTF.

CATHERINE KEENER

Catherine guest-starred in one episode of Seinfeld in 1992. Titled: The Letter

Photo [Left]: Catherine portrayed an artist who was dating Jerry. Catherine was super-cute!

Photo [Right]: Bio-Males have 40% larger lungs and trachea, explaining Catherine's massive neck & trunk expansion.

This is Joel and Victoria Osteen. They're both transgender and hope you are too blinded by their ridiculously ostentatious stage and theater to notice that Victoria could snap Joel like a twig if necessary. Just look at the difference in size of their arms. Victoria is a beast.

Okay, let's compare their skulls next ...

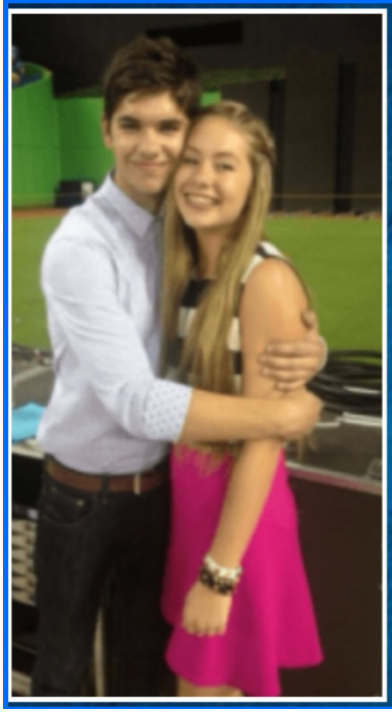
Photographic documentation of skeletal markers of suspected EGI subjects

Victoria's Male skull markers:

*Large square Male skull
*Wide-set deep-set ocular orbits (eye sockets) Male eyes
*Wide Male dental arch
*Large square Male mandible

Joel's Female skull markers:

*Small oval Female skull
*close-set fwd-set Female ocular orbits
*Small Female mouth with narrow Female dental arch
*Soft Female jaw



These are the Osteen children, Jonathan Osteen and Alexandra Osteen, and I have a question:

If Jonathan is 3 years older than his sister Alexandra, why is Alexandra's skull twice as large?

Piers Morgan's Female Skeletal Markers:

*Oval Female skull w/soft jawline

*Short Female neck

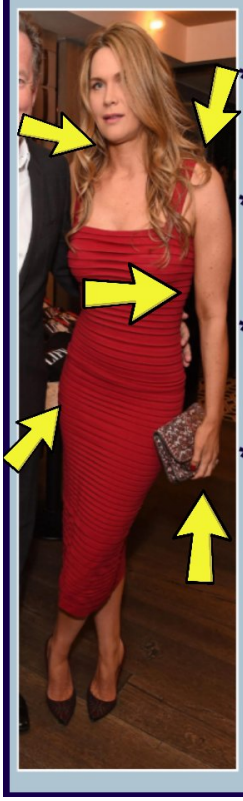
*Narrow Female ribcage

*Small Female hands

*Wide Female Pelvis

Please note Piers' short, Female humerus bone (Upper arm bone), and the akimbo-positioning of Piers' arms. Female arms do not hang straight bc they are designed to avoid contact with the wide Female pelvis when walking

Celia Walden's Male Skeletal Markers:



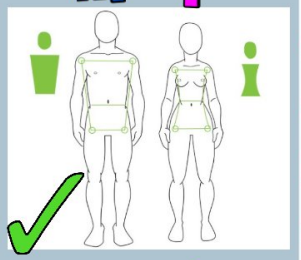
*Long, thick Male neck

*Wide, square Male shoulders

*Long, thick Male arms w/large Male hands

*Narrow Male hips

Note: Legs crossed to give the appearance of Female hips where none actually exists



This is an obvious MTF transgender

Tom Colicchio

Photographic documentation of skeletal markers of suspected EGI subjects

Tom Cruise has undergone extensive female feminization facial procedures, so we'll focus on Tom's basic skeleton. Okay, let's go:

*Small, oval Female Skull
*Short Female neck (although Tom does have an Adam's apple implant)
*Narrow, sloped Female shoulders
*Short arms that hang akimbo (Female traits)
*Tom's wide pelvis helps create Tom's Female shoulder to hips ratio

Tom's wider pelvis renders his q-angle more pronounced than Katie's. I believe Tom and Katie used a surrogate, but if one of them did give birth to Suri, it certainly was not Katie.
